Re: Armco Inc., Kansas City Facility  
HSWA Corrective Action Program  
Permit Number MOD 007 118 029  
Paving activities at SWMU 3

Dear Mr. Spratlin:

In accordance with Part II, Section XI.A of the Permit, Armco Inc. is providing notification of planned modifications at our Kansas City, Missouri, Facility. This notification is provided to communicate planned surface modifications to Solid Waste Management Unit (SWMU) 3 -- South of Bar Fab Landfill.

The modification consists of a paved access road to be constructed over the top of the closed landfill. The access road will provide ingress to an area South of the landfill that is currently inaccessible. The paving work will consist of the placement of a three (3) inch layer of asphaltic base course or a 6" Aggregate base, covered by a 3" surface course of asphalt. All paving activities will occur over the existing ground surface. Subsurface excavations will be not be conducted. Further information regarding the history of the South of Bar Fab Landfill can be found in Sections II-2.2 in the RCRA Facility Investigation Workplan dated March 14, 1996.

The Phase 1 investigation findings at SWMU 3 are outlined in the RFI Phase 1 Data Package, dated December 1, 1997. Armco plans no additional investigations for this area. The paving activities will be initiated in late January.

If you have any questions regarding this notification, please contact me at (816) 242-5855.

Very truly yours,

Myrl R. Wear  
Manager Environmental Affairs
